Rules & Evaluation Criteria

SHIP OR GO HOME

🎯 Eligibility for Prizes

Deployment	The project must be live and publicly accessible on Netlify (URL must end with `.netlify.app`).
Tools	The project must use both **Qoder** and **Charlie Labs** in a meaningful way.
Submission	Teams must submit the live link and pitch **before 17:00**. No late submissions.
Team Presence	At least one team member must be present at the final demo/pitch session.

📊 Evaluation Criteria

Judging focuses on **commercial potential** more than technical complexity.

Problem 01

→ Does this pass the mum test?
→ Do customers clearly exist?

Solution 02

→ Does the product actually solve the problem?

Market Size 03

→ Is the market large enough for a venture-scale company?
→ Is there room to grow?

Business Model 04

→ How does the startup make money?
→ Is revenue realistic and scalable?

Moat 05

→ Why can't others easily copy this?
→ Any defensibility (tech, distribution, data, brand, speed)?

Product 06

→ Is there a working demo?
→ Does it feel like something people would actually use?

Less talk. More signal. Build something people want. 🚀
